The following defects in the form or contents of the international application have been noted:

see separate sheet

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The subject-matter of claims 9 and 10 has not been searched and hence no opinion will be made on these claims.

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. The subject-matter of independent claims 1 concerns a pivoting panel system comprising a front panel, a back panel and at least one intermediate panel all pivotably mounted independently of each other. This feature is neither known from nor rendered obvious by any of the cited prior art and the subject-matter of claim 1 appears to be novel and inventive within the meaning of Article 33 (2) and (3) PCT.
2. The dependent claims 2 to 8 are therefore likewise novel and inventive.
3. The subject-matter of the claims is industrially applicable within the meaning of Article 33(4) PCT.

Re Item VII

Certain defects in the international application

4. Rule 6.2(b) PCT requires that the features of the claims are provided with reference signs placed in parentheses.
5. Independent claim 1 is not in the two-part form in accordance with Rule 6.3(b) PCT, which in the present case would be appropriate, with those features known in combi-
